SHORT PREVIEW

OBJECTIVE OF ONLINE RESUME BUILDER:

The main objective of the Online Resume Builder is to manage the details of Resume, Job, Individual, Skills, Qualification. It manages all the information about Resume, Jobseeker, Qualification, Resume. The project is totally built at administrative end and thus only the administrator is guaranteed the ac-cess. The purpose of the project is to build an application program to reduce the manual work for managing the Resume, Job, Jobseeker, Individual. It tracks all the details about the Individual, Skills, Qualification.

This project is to create a dynamic website in which you can generate your CV. I use Flask as minimalistic framework that allows to write very concisely web apps and plays nicely with a bunch libraries. Flask is one such library that allows to write content in Markdown and have it automatically converted to the equivalent html. Finally, Frozen-Flask can be used to "build" static Flask applications, turning everything into a collection of static html/CSS files that can be put on a web server (Tomcat, python) without needing additional technologies. In this Project you can also generate the pdf by clicking on the Print button.

FEATURES OF ONLINE RESUME BUILDER ARE AS FOLLOWS:
